# Current Status

- RSS sources
- Twitter
- Summaries
- Personalization
- Test ongoing

The screenshot displays the StoryBot interface, which is designed for news aggregation and personalization. On the left, a sidebar identifies the user as Lily Wagner and shows a search bar. The main content area is divided into two columns. The left column, titled 'News Summaries', lists three news items: a live stream announcement, a report on Oprah's potential presidential run, and a confirmation of Trump's attendance at the Davos gathering. The right column, titled 'White House confirms Trump to attend Davos gathering, synonymous with wealth and power', shows a cluster of six related RSS items. Each item in the cluster includes a headline, a timestamp, a thumbnail image, and a category label 'IPTC categories'.

# StoryBot Thank you...
